PROFESSIONAL SUMMARY

Computer Science Engineering (Data Science) undergraduate with a solid foundation in programming, web development, and applied artificial intelligence. Experienced in designing and building end-to-end applications using Java, Python, JavaScript, React.js, Node.js, and Express.js, with working knowledge of relational databases and RESTful API design. Completed structured virtual internships in Google Cloud Generative AI and Robotic Process Automation (UiPath), gaining practical exposure to prompt engineering, cloud-based AI workflows, and business process automation. Comfortable working independently or as part of a team, translating requirements into working software, and using modern AI-assisted development tools such as GitHub Copilot and ChatGPT to accelerate delivery without compromising code quality. Actively seeking a Software Developer internship or entry-level engineering role where I can apply my technical skills, grow under experienced mentors, and contribute to real, production-facing projects.

CORE COMPETENCIES

Full-Stack Web Development • RESTful API Design & Integration • Data Structures & Algorithms • Object-Oriented Programming • Database Design (SQL/MySQL) • Version Control (Git/GitHub) • Cloud & Generative AI Fundamentals • Robotic Process Automation (RPA) • Debugging & Problem Solving • Agile Collaboration & Communication

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript

Web Technologies: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, Tailwind CSS, REST APIs, Axios

Databases: SQL, MySQL — schema design, queries, and data modelling

Tools & Platforms: Git, GitHub, Visual Studio Code, Google Cloud Platform, UiPath Studio

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI Tools: Google Cloud Generative AI, ChatGPT, GitHub Copilot

Professional Skills: Problem Solving, Team Collaboration, Adaptability, Communication, Leadership, Time Management

EXPERIENCE

Automation Developer Associate Virtual Intern *January 2026 – March 2026*
EduSkills & UiPath

- Completed a rigorous 10-week Automation Developer Associate Virtual Internship centered on Robotic Process Automation (RPA) principles and practices.
- Designed and built automation workflows in UiPath Studio, applying variables, control flow, and selectors to automate repetitive, rule-based business tasks.
- Studied end-to-end business process automation concepts, including process analysis, workflow mapping, and exception handling.
- Strengthened analytical thinking and structured problem-solving through hands-on lab exercises and project-based assignments.
- Collaborated within a virtual cohort environment, following guided milestones and submitting deliverables against internship timelines.

Google Cloud Generative AI Virtual Intern *September 2024 – October 2024*
SmartBridge & SmartInternz

- Completed a virtual internship focused on Google Cloud's Generative AI ecosystem, covering foundational cloud-based AI concepts.
- Practiced prompt engineering techniques to improve the quality, relevance, and reliability of generative AI outputs.
- Applied AI concepts through structured assignments and hands-on labs, building practical familiarity with cloud AI tooling.
- Strengthened problem-solving skills and cloud computing fundamentals directly applicable to AI-driven application development.

PROJECTS

Train Tracker Application

React.js | TypeScript | Node.js | Express.js | Tailwind CSS | Axios

- Developed a full-stack railway tracking platform enabling users to search trains and check live PNR status in real time.
- Architected and integrated frontend and backend services using Axios and RESTful API design principles for reliable data exchange.
- Built favorites and recent-search features to improve repeat-user experience and reduce friction for frequent travelers.
- Implemented a fully responsive, mobile-friendly interface using Tailwind CSS, ensuring consistent usability across device sizes.

Advanced Snake Game

Python | Pygame

- Built a feature-rich Snake Game from scratch in Python using the Pygame library, covering core game-loop architecture.
- Implemented score tracking, multiple lives, and progressive level difficulty to increase player engagement and replay value.
- Added pause/resume functionality and precise collision detection logic to ensure smooth, bug-free gameplay.
- Designed an intuitive interface supporting both keyboard and mobile-friendly controls, and optimized game logic for consistent frame performance.

CERTIFICATIONS

Tata Group Data Analytics Job Simulation *July 2026*

Forage

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata iQ.
- Conducted exploratory data analysis (EDA) using GenAI tools to assess data quality, identify risk indicators, and structure insights for predictive modeling.
- Proposed and justified an initial no-code predictive modeling framework to assess customer delinquency risk, leveraging GenAI for structured model logic and evaluation criteria.
- Designed an AI-driven collections strategy leveraging agentic AI and automation, incorporating ethical AI principles, regulatory compliance, and scalable implementation frameworks.

EDUCATION

Bachelor of Technology – Computer Science Engineering (Data Science) 2024 – Present

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Machine Learning Fundamentals

Senior School Certificate Examination (Class XII) 2024

Translam Academy International, Meerut

Secondary School Examination (Class X) 2022

Annie Besant School, Meerut

ADDITIONAL STRENGTHS

- Communication: Strong written and verbal communication skills, including the ability to give constructive feedback and collaborate effectively with developers, mentors, and stakeholders.
- Leadership: Proven ability to manage multiple projects simultaneously and meet tight deadlines while maintaining high standards of quality.
- Adaptability: Quick to pick up new tools, frameworks, and workflows, demonstrated across web development, RPA, and generative AI engagements.
- Languages: English (Professional Proficiency), Hindi (Native).
